Peter Bethune	1723	1790	It's often noted that he is the first to be interred at the Old Scotch Graveyard, but there is no written evidence to support this supposition. Actually, since it was some 15 years after the establishment of the graveyard, it seems improbably that it would take 15 years before someone would be buried in this graveyard. And, data show that these 7 individuals precede Bethune's interment.
